## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1, 20-39, and 43-46 are allowed.
2. The following is an examiner's statement of reasons for allowance: This invention deals with a device comprising a cable clamp including a conductive flexible fabric having at least one pattern formed therein, wherein the pattern accommodating the cable therein and is of a star shaped pattern formed in the fabric, and wherein the pattern includes a plurality of evenly spaced slits radially extending outward from a center of the pattern and wherein every two adjacent slits form a triangular flap (claim 1). This invention also deals with a conductive cable clamp disposed in the opening and being electrically coupled to said system frame, said cable clamp being adapted to clamp and conductively engage a periphery of the conductive shield, said cable clamp preventing electromagnetic radiation from passing through the opening by the periphery of said cable, and a conductive adhesive bonding said cable in the cable clamp (claim 27). This invention also deals with a method of electrically coupling a first electrical component disposed in a first subsystem with a second electrical component disposed in a second subsystem wherein a cable clamp includes a conductive flexible fabric having at least one pattern formed therein, wherein the pattern accommodating the cable therein and is of a star shaped pattern formed in the fabric, and wherein the pattern includes a plurality of evenly spaced slits radially extending outward from a center of the pattern and wherein every two adjacent slits form a triangular flap (claim

39). The above stated claim limitations, in combination with other claim limitations, is not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Response to Arguments***

3. Applicant's arguments filed December 20, 2004 have been fully considered and they are persuasive. Specifically, the applicant's argument that Syed nor Damn either alone or in combination disclose the gasket including a star-shaped pattern which accommodates a cable therein, nor a star-shaped pattern which includes a plurality of evenly spaced slits which radially extend outward from a center of the pattern, with every two adjacent slits forming a triangular flab, as recited in both claims 1 and 39 or a conductive adhesive bonding the cable and the cable clamp, is persuasive and therefore the claims have been allowed.

### ***Communication***
